

RESIDENT NOTICE

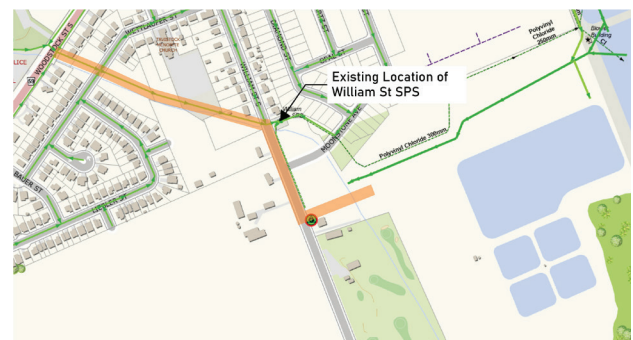

June 25, 2026

Notice of topographic field survey work

Survey work for the William Street Sanitary Pumping Station in Tavistock will take place during the weeks of June 29 and July 6 on municipal property and easements

About this project

Oxford County has awarded a contract to Stantec Consulting Ltd. for engineering design services for replacement of a 375-millimetre diameter vitrified clay trunk sewer that has reached the end of service life, and to relocate the existing William Street Sanitary Pumping Station (SPS). The map on the right provides the approximate location of the trunk sewer and new William Street SPS.

Work to be undertaken

This notice is to inform you that field survey crews will be performing work along the trunk sewer replacement alignment (orange line on the map). This work will be restricted to municipally owned property along William Street South and within the existing easement between William Street South and Woodstock Street South. If you have any questions, please reach out to the contact at right.
